EDUCATION

Bachelor of Computer Science Binus University

2021 – Expected Graduation in 2025
GPA 3.87 / 4.00

HARD SKILLS

- PHP Language (Laravel)
- C# Language (.NET Core)
- Java Language
- MySQL
- Microsoft SQL Server
- Web Programming (HTML, CSS, Javascript)

SOFT SKILLS

- Communication
- Problem Solving
- Team Work
- Time Management

LANGUAGES

- Bahasa (Native)
- English (Intermediate)

ABOUT ME

A final-year student majoring in Computer Science at Bina Nusantara University with a high interest in software development, particularly in Back-End Development. Experienced in developing web applications using PHP with the Laravel framework and building APIs using C# with the .NET framework. Proficient in database management using MySQL and SQL Server. Additionally, has authored and presented a scientific paper at ICCSCI 2023 and published it in Elsevier.

EXPERIENCE

Back End Developer – Intern

Feb 2024 – Feb 2025

PT. Mixtra Inti Tekindo

- Developing APIs using C# and .NET Framework to provide data to the Front End and ensure optimal integration in the Warehouse Management System Project.
- Fixing bugs and optimizing code to ensure the system runs as expected and performs efficiently, including corrections to stock calculation logic that was previously inaccurate.
- Integrating with ERP SAP, ensuring transaction data is transmitted and received smoothly.

Author

Feb 2023 – Aug 2023

The 8th International Conference on Computer Science and Computational Intelligence – Malang, Indonesia

- Participated as a campus representative in conducting research on a scientific paper with the topic of Computer Science and Computational Intelligence.
- Wrote and prepared a scientific paper utilizing Artificial Neural Network and Decision Tree algorithms, with implementation in Python.
- Presented research findings at a conference in front of professors and other researchers.

CERTIFICATES

Contribution as an Author in publishing paper

Aug 2023

International Conference on Computer Science and Computational Intelligence

Paper DOI : doi.org/10.1016/j.j.procs.2023.10.540
